## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 22-33 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest a substrate processing apparatus for performing resist coating processing and development processing on a substrate, comprising: a) a coating unit provided with a first plurality of processing parts including a coating part for performing resist coating processing on a substrate; b) a development unit provided with a second plurality of processing parts including a development part for performing development processing on a substrate; c) an inspection unit provided with a plurality of inspection parts for performing substrate inspection of different contents respectively, said inspection unit being arranged between said coating unit and said development unit; d) a transport part for transporting a substrate to said first plurality of processing parts, said second plurality of processing parts and said plurality of inspection parts; and **e) a transportation control part for controlling said transport part so that each of part or all of a set of plural substrates subjected to the same processing is transported to a single inspection part selected from said plurality of inspection parts, thereby transporting at least one and less than all of said set of plural substrates to each of said plurality of inspection parts OR e) a transportation control part for controlling said transport part so that each of part of all of a set of plural substrates subjected to the same processing is transported to said inspection part, wherein a substrate transported to said inspection part undergoes substrate inspection of a single content selected from said plurality of contents that said inspection part is capable of performing, so that said inspection part performs substrate inspection of each of said plurality of contents on at least one and less than all of said set of plural substrates. Applicant has amended the independent claims to clarify that the transport part is controlled via a transportation control part and accompanying control programs. The recited control programs are not disclosed in the prior art.**
